

NEPROPLAST PVC DRAIN-WASTE-VENT (DWV) ASTM FITTINGS FOR DRAINAGE SYSTEM

NEPROPLAST

NEW PRODUCTS INDUSTRIES CO. LTD

Distributed by
National Marketing Est. Co. Ltd

Certificate of Registration

Intertek

This is to certify that the Quality Management System of

New Product Industries Co. Ltd.(NEPROPLAST)

P.O. Box 460, Jeddah 21411, Kingdom of Saudi Arabia

has been assessed and registered by MICL as conforming to the requirements of

ISO 9001: 2008

The Quality Management System is applicable to

The manufacture of upvc & cpvc plastic pipes & fittings and hdpe plastic pipes.

Certificate Number: 27050
Initial Certification Date: 20 September 2012
Certificate Expiry Date: 19 September 2015

Calin Mădălin, President

Moody International Certification Ltd TIA Intertek - Merin House, Stanier Way, Wye, Weymouth, Dorset, Dorset, United Kingdom
Moody International Certification Ltd (TIA Intertek) is a UKAS accredited body under schedule of accreditation no. 014.

In the issuance of this certificate, Intertek assumes no liability to any party other than to the Client, and then only in accordance with the agreed upon Certification Agreement. This certificate's validity is subject to the organization maintaining their system in accordance with Intertek's requirements for systems certification. Validity may be confirmed via email at certification@intertek.com or by scanning the code to the right with a smartphone.

MOODY INTERNATIONAL CERTIFICATION

New Product Industries Co.Ltd

NEPROPLAST

P.O.Box-460, Jeddah - 21411

Kingdom of Saudi Arabia

BS EN ISO 9001:2000

SCOPE OF REGISTRATION:

The Manufacture of uPVC and CPVC Plastic Pipes and Fittings

CERTIFICATE NO: 27050

Subject to continued compliance with ISO 9001 and the Moody International Certification Scheme Rules and Regulations, your certificate of which scope of Registration document is part is valid indefinitely

Further Clarification regarding the scope of this certificate and the applicability of ISO 9001:2000 requirements may be obtained by consulting the above Organisation

While all due care and skill was exercised in carrying out this audit, Moody International Certification Ltd. accepts responsibility only for proven gross negligence.

Certified that this is a copy of the original certificate issued by Moody International

Facility : Jeddah, Saudi Arabia

STANDARDS

PVC is the most frequently specified of all thermoplastic materials. It has been used successfully for over 50 years in such areas as Potable drinking water system, chemical processing, industrial plating, chilled water distribution, deionized water lines, chemical drainage, and irrigation system. PVC is characterized by robust high physical properties and resistance to corrosion and chemical attack by acids, alkalies, salt solutions and many other chemicals. It is attacked, however, by polar solvents such as ketones, some chlorinated hydrocarbons, and aromatics. The maximum service temperature of PVC is 60°C. With a design stress of 2,000 psi, PVC has the highest long-term hydrostatic strength at 23°C of any of the major thermoplastics being used for piping systems. PVC is joined by solvent cementing, threading, flanging and rubber ring sockets.

Standards

ASTM Standards D 2665 and D 3311

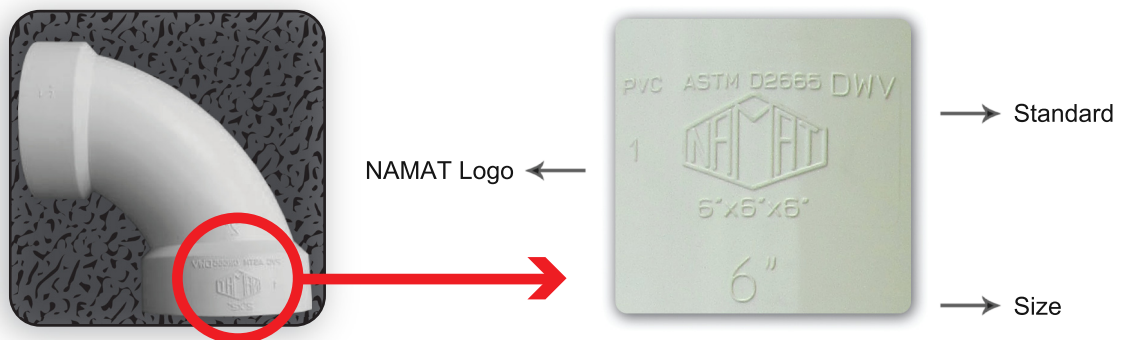

NAMAT PVC DWV Fittings are manufactured and tested according to ASTM D 2665, Geometric. NAMAT PVC DWV Fittings conformed to ASTM D 3311.

Color

NAMAT PVC DWV Fittings Color - White

Marking

NAMAT PVC DWV Fittings are marked as specified in the ASTM Standard indicating Manufacture Name Standard, Size, Type and NAMAT Logo, or pipe insertion size

Approval

NSF Standard 61 was developed to establish minimum requirements for the control of potential adverse human health effects from products which contact drinking water. This standard complements the performance requirements that are contained within ASTM product standards. NAMAT PVC & CPVC fitting products intended for potable water application have been tested and certified by a third - party agency for material compliance to NSF Standard 61.

Jointing

NAMAT PVC DWV Fittings are socket type for solvent cement jointing

SOLVENT CEMENT WELDING

This method of joining is very simple and reliable if it is followed correctly, but any deviations from the recommended basic steps may reduce the strength and integrity of the joint. The procedures for preparation, insertion, and curing should be followed. For further details please consult National Marketing sales office.

Cutting

- Pipe must be cut square (90° angle) using a miter box saw or a plastic pipe cutter
- All burrs or raised beads from the end of the pipe must be removed
- Pipe edge must be bevelled

Priming and Cementing

Primer (Fitting-Pipe-Fitting):

Cement (Pipe-Fitting-Pipe)

Safety Precautions

Solvent cement and primer contain highly volatile solvents. Use them in a well ventilated area, keep away from naked flames, avoid smoking, switch off unprotected electrical apparatus and electric heaters, discontinue any welding operation, observe all instructions issued by solvent cement manufacturer & always obey the safety regulation issued by the authorities responsible.

ADVANTAGES OF NAMAT PVC DWV FITTINGS

Corrosion Resistance:

NAMAT PVC DWV Fittings being a non - conductor and non - mettalic. It resist all types of galvanic and eletro-mechanical influences, all types of corrosion caused by water, industrial liquids and chemicals. Thus increasing the life time of installed DWV piping system.

Resistance to biological attack and Bacteria growth:

NAMATPVC DWV Fittings are resistant to any microscopic life that it might be exposed to. It does not offer a nourishing source to any bacterial life form and is completely guaranteed to withstand any such growth.

Resistance to abrasion:

NAMATPVC DWV Fittings are highly resistant to abrasion due to stress from abrasion fluids of excessive pressure. Tests have shown that DWV Piping System are up to 2.5 times more resistant to abrasion when compared to steel.

ADVANTAGES OF NAMAT PVC DWV FITTINGS

Reaction with building materials:

NAMAT PVC DWV Fittings do not react with any of the normal building materials like cements and paints. However, information about chemical resistance of NAMAT Fittings to a wide range of chemicals can be found in the tables of chemicals resistance list. please consult with National Marketing Sales Office.

Effect of Sunlight:

Long exposure to direct sunlight causes the color of NAMAT PVC DWV Fittings to fade, in addition to the reduction of impact strength. The effect of sunlight does not seriously affect the performance of the system, however it is always advisable to protect the system from the direct exposure to sunlight.

Effect of frost:

NAMAT PVC DWV Fittings are not affected by frost, however sub-zero temperature reduce the impact strength of the DWV system. Therefore, extra care is to be given while handling and installing PVC piping system during sub-zero temperatures.

Fire Proof and flamability:

NAMAT PVC DWV Fittings do not support combustion and are self extinguishing as per BS2782. Pipes systems will not burn unless an external flame source is applied. NAMAT PVC DWV Fittings are non-toxic and will not affect taste, smell or color of drinking water or any other liquid. Extensive tests on Fittings compounds prove their outstanding fire performance.

Ease of handling, during installation and maintenance
